

Ami PLATFORM

**Independent Living Ireland
SBIR Challenge**

All Ireland Smart Cities Forum Annual Conference 2019

THE CHALLENGE

Cork County Council wished to explore low cost, innovative and accessible solutions that will help all of its older citizens to maintain a good quality of life and enable them to remain and feel secure in their home.

Solution - Ami Platform

Connected community care with a number of key features:

- Allows community groups and local authorities to share data and resources.
- Integration with smart sensors to detect falls or other emergency events in the home.

Collaboration

- The Ami Platform was developed in partnership with a number of organisations including Cork County Council, Cork City Partnership and the Age-Friendly Council in Mitchelstown.
- We would like to extend this network and work with local authorities seeking to implement smart sustainable solutions to support older people in their area.
